

Legal Disclaimer: Cosmic Coin Protocol

This document outlines the legal, regulatory, and technical positioning of the Cosmic Coin protocol and associated ecosystem entities.

1. General Notice

Cosmic Coin is a decentralized, open-source blockchain protocol intended for experimentation, development, and research in the field of distributed economic systems. This document and any associated whitepapers, websites, or presentations do **not** constitute:

- An offer of securities
- Investment advice
- A solicitation for investment in any jurisdiction
- A promise of returns, dividends, or financial guarantees

All participation is voluntary and should be conducted after independent review.

2. No Guarantee of Returns

Participants in the Cosmic Coin Genesis Round or any subsequent activity should understand: - Coins do not represent shares, equity, or financial instruments. - Coin values are not guaranteed and may fluctuate. - There is no entitlement to future profits or voting power over the protocol.

3. Regulatory Uncertainty

Blockchain systems face varying regulatory interpretations worldwide. Cosmic Coin is designed as a protocol and **not operated by a central company**. However: - Participants must ensure compliance with local laws before participating. - Cosmic Labs, the administrative body, does not function as a financial institution. - No regulated exchanges, banks, or custodians are involved at this time.

4. Open Source License

All source code, smart contracts, and protocol logic associated with Cosmic Coin will be published under the **MIT License** after successful completion of the public testnet phase.

This means: - Anyone can use, modify, and distribute the code freely. - No warranties are provided. - Contributors are not liable for damages or malfunctions.

Until the public testnet audit is passed, code will be published as read-only reference only.

5. Smart Contract Audit Notice

Cosmic Coin protocol will undergo full third-party audits **before mainnet launch**.

- Audits will test for vulnerabilities in entropy handling, burn triggers, wallet logic, and consensus rules.
- A public bounty program will also be introduced during the testnet phase.
- Until audits are complete, the protocol remains in development.

Use at your own risk.

6. No Central Control

Cosmic Coin is not governed or controlled by any individual, company, or foundation. While **Cosmic Labs** manages tooling, migration, and development: - It does not have the ability to halt, reverse, or override protocol logic. - It cannot access, freeze, or modify user wallets. - It exists solely as an enabler — not a governing authority.

7. Future Risk

The Cosmic Coin ecosystem may be affected by: - Regulatory changes - Quantum computing breakthroughs - Cryptographic vulnerabilities - Community abandonment or forking

These risks are acknowledged and documented in the **Risks & Mitigations** report.

8. Community Usage & Responsibility

Anyone using, building on, or promoting Cosmic Coin should: - Read the official documentation and whitepaper - Understand that protocol participation is **non-reversible** - Avoid making unauthorized financial claims or speculative promotions

Misuse or misrepresentation of Cosmic Coin in violation of this disclaimer may be subject to removal from affiliated platforms or public reporting.
